✉ ankita_bk@hotmail.com   ☎ +1-604-360-0105   ⚲ British Columbia   in LinkedIn

SKILLS

- **Quantitative Analysis:** Proficient in regression analysis, predictive analytics, and data clustering techniques.
- **Sustainability Solutions:** Developed frameworks using LC assessment tools and carbon offset methodologies.
- **Risk Management:** Versed in deploying risk assessment software for financial stability enhancement.
- **Process Optimization:** Advanced proficiency in ERP and MRP systems, focusing on SAP for workflow.

WORK EXPERIENCE

Central Analyst (Independent Contractor)   **January 2020 – Present**
Euromonitor - Remote, Canada

- Led a project for the Public Health Agency of Canada, analyzing trends and behaviors across 10,000+ consumer responses related to vaping products, providing actionable recommendations aligned with public health policies.
- Spearheaded product research and development for L'Oréal China's sustainable shampoo initiative, integrating eco-friendly packaging and ingredient solutions across 5 product lines to meet the company's sustainability goals.
- Conducted market research and competitive analysis for IKEA Canada, analyzing over 20,000 data points using data-mining techniques to support product strategy with insights into market trends and sustainability initiatives.

Senior Account Manager, Brand Partnerships   **August 2022 – December 2022**
TerraCycle - Toronto, Canada

- Facilitated a recycling plan for vape pods with Rothman Benson & Hedges, aligning with environmental regulations and reducing the company's environmental footprint by streamlining waste management across 3 facilities.
- Created a business case for Conagra's transition to EPR-compliant packaging using lifecycle assessment models, material flow and cost-benefit analysis, improving product lifecycle impact across 15 product categories.
- Led sustainability reporting initiatives for Diva Cup, enhancing environmental transparency and improving stakeholder engagement through detailed reporting and impact metrics across 12 quarterly reports.

E-Commerce Manager, Database & Analytics Lead   **September 2020 – January 2022**
Nada Grocery - Vancouver, BC

- Led the development of carbon footprint analysis tools, achieving a 20% reduction in emissions and aligning with Nada Grocery's net-zero targets through overhauling operational practices at 4 warehouse facilities.
- Negotiated circular supply chain agreements with 100+ vendors, ensuring the sustainable sourcing of environmentally friendly products and reducing waste across the supply chain by optimizing 30,000+ SKUs.
- Managed a cross-functional team of five, overseeing projects related to sustainability, waste reduction, and carbon management, while mentoring associates for professional growth and improving operational efficiency by 25%.

Consultant   **January 2018 – July 2019**
KPMG - Mumbai, India

- Inceptualized an investment policy for the Government of Goa, which attracted green investments and created 50,000 jobs, fostering economic sustainability through the implementation of over 200 community projects.
- Advised Hyundai's senior management in South Korea on Electric Vehicle market strategy for India, supporting the development of the Hyundai Kona EV to meet market demands across 5 key regional markets.
- Implemented policy advice to the Provincial Chief Electoral Officer, enhancing inclusivity and fairness in the election process for marginalized communities through reforming voting processes in over 100 voting districts.

Risk Analyst   **June 2012 – March 2014**
Genpact - Mumbai, India

- Facilitated strategic internal audit reports for luxury hotel chains such as Westin and Sheraton using risk assessment frameworks and data visualization tools, enhancing risk management and compliance across 15 operations.
- Conducted compliance and process audits for GE Industrial Solutions, improving operational efficiencies by 30% through mapping processes in accordance with Sarbanes-Oxley regulations for over 20 industrial sites.
- Led risk analysis efforts for 50+ financial products, employing predictive analytics and risk management strategies to identify and mitigate potential risks, improving the overall risk profile by 20%.
